Experience

XP Inc. São Paulo, SP - Hybrid

Software Engineer II *Oct 2025 - Present*

- Led the modernization of a critical asset settlement platform (equities, fixed income and funds), strengthening the enrichment and validation of input data.
- Continue to lead the platform's evolution, ensuring that each product is settled according to its own rules.
- Developed event-driven microservices in C# and .NET, running on Azure (AKS) with Kafka and RabbitMQ, prioritizing availability, scalability, reliability and maintainability.
- Structured CI/CD pipelines and monitored application behavior in production through Grafana and Dynatrace, tuning whatever was needed to maintain performance.
- Bridge technology and the product, business and regulatory areas: listen to their needs, help redesign operational flows and turn them into architecture decisions (synchronous, asynchronous or batch).
- Maintain and develop new features in the credit collateral workflow, including the processes for blocking and unblocking assets.
- Work on the workflow's margin call rules, which detect when collateral no longer covers the contract and trigger replenishment.
- Review code frequently, support the onboarding of new developers and mentor junior engineers, with full autonomy in day-to-day work.

ButtiniMoraes São Paulo, SP - Hybrid

Full Stack Developer (Back-End Focus) *May 2024 - Sep 2025*

- Developed high-complexity tax automation and legal compliance solutions, and migrated legacy systems from .NET Core 2.2 to .NET 8.
- Structured independent microservices with automated CI/CD and cloud deployments.
- Optimized SQL queries and data models for large volumes of tax data.

Skills

- **Architecture & Practices:** Distributed Systems, Event-Driven Architecture, Microservices, REST APIs, High Availability, Performance Tuning, Domain-Driven Design, Clean Architecture, CQRS, SOLID, Design Patterns, Clean Code, Agile
- **Languages & Frameworks:** C#, .NET, Java, Spring Boot, Go (learning)
- **Messaging & Data:** Kafka, RabbitMQ, Redis, SQL Server, PostgreSQL, MongoDB, Oracle
- **Cloud & DevOps:** Azure, AWS, Docker, Kubernetes, CI/CD, Jenkins, GitHub Actions
- **Observability:** Grafana, Dynatrace, Jaeger
- **Languages:** Portuguese (Native), English (Advanced)

Education

FIAP São Paulo, SP

B.S. in Software Engineering *2022 - Expected 2026*
